

ASHRAE 62.2 NOTIFICATION FORM

Client: _____

ASHRAE 62.2 is a Health and Safety measure adopted by the Department of Energy, which may be installed in the home when weatherization services are funded by the Weatherization Assistance Program.

The goal of ASHRAE 62.2 is to provide ventilation in order to maintain healthy indoor air quality for the occupant(s) of the home. Some of the benefits of ASHRAE 62.2 include:

- Moisture management
- Improved indoor air quality
- Ventilation system specifically designed for your home

The ASHRAE 62.2 ventilation system installed in your home will not be an energy burden or present a comfort issue.

The most common installation includes an exhaust fan along with a timer control. The occupant(s) will be able to operate the fan as needed, while the timer control will be designed to operate independently to meet the ventilation needs of the home. The occupant(s) of the home will receive instruction on how to operate the system, and how to disable the system for maintenance or repair.

Not every home will require an ASHRAE 62.2 ventilation system. It may not be known until the work has started that an ASHRAE 62.2 ventilation system is necessary. If, during the installation of weatherization materials it becomes necessary to install an ASHRAE 62.2 ventilation system, the Energy Auditor will explain where the system will be installed and how to operate the ventilation system. It is important to understand that the provider performing weatherization services on this home may need to install an ASHRAE 62.2 ventilation system at any point during the project, as it is a Health and Safety measure.

If applicable, describe the ventilation system designed for this home and where it will be installed along with other measures to be in compliance with ASHRAE 62.2.

I understand that ASHRAE 62.2 measures may be required and I give the weatherization provider permission to carry out these measures. I also understand that if I were to decline these measures that weatherization services cannot be performed on this household.
